

GRP POLES

ALIZÉ RANGE

Poles in the ALIZÉ range are manufactured in glass fibre-reinforced polyester, using the same process as for the TRADITION range. But the nature and the proportions of the glass and resin in the composite are different.

This range is on a par with imported poles in terms of price, but in terms of quality it is far superior thanks to the hot moulding manufacturing process.

Alizé range		FLAGPOLES LENGTH (meters)						
		6	7	8	9	10	11	12
Weights (kg) and measurements (mm)								
POLE	Diameter of base	106	112	118	124	130	136	142
	Diameter of top	70	70	70	70	70	70	70
	poids sans pied	9	10,5	14	17	20	24	29
	Weight including rocking base	14	16	19,5	24	27	31	36
FIXING	Length of anchorage bars	500	500	500	500	500	500	500
	Depth in concrete	420	420	420	420	420	420	420
DEVICE (to ground)	Diameter of anchorage bars	16	16	16	16	16	16	16
	Centre-to-centre measurements	135	135	135	135	135	135	135
	Width of base plate	180	180	180	180	180	180	180
	Length of base plate	190	190	190	190	190	190	190
